Art Unit: 1651

The amendment filed 3/30/04 is acknowledged. Claims 1-4 are being considered on the merits to the extent that they pertain to *Saccharomyces*.

Claims 1-4 are withdrawn from consideration to the extent that they do not pertain to the elected species. The claims should be amended to reflect the election made.

Claim Rejections - 35 USC § 102

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-4 are rejected under 35 U.S.C. 102(e) as being anticipated by Millis *et al.* for the reasons as stated in the last Office action and the further reasons below.

Response to Arguments

Applicant's arguments have been fully considered but they are not deemed to be persuasive.

While it is true that the reference does not teach the production of farnesol and/or geranylgeraniol by culturing *Saccharomyces* in the presence of one of the recited oils, it discloses a method for the production of farnesol and/or geranylgeraniol by culturing various strains of *Saccharomyces* in the presence of a surfactant. See, e.g., Examples 1, 13 and 19, wherein the surfactant is Dow 1520. See, in particular, col. 36, line 6.

Therefore the rejection is deemed proper and it is adhered to.

Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Chambon *et al.* for the reasons as stated in the last Office action and the further reasons below.

Response to Arguments

Applicant's arguments have been fully considered but they are not deemed to be persuasive.

Art Unit: 1651

While it is true that the reference does not teach the production of farnesol and/or geranylgeraniol by culturing *Saccharomyces* in the presence of one of the recited oils, it discloses a method for the production of farnesol and/or geranylgeraniol by culturing *Saccharomyces* in the presence of a surfactant. See, e.g., Table 5, page 43, wherein the surfactant is Tergitol NP 40.

Therefore the rejection is deemed proper and it is adhered to.

No claim is allowed.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
